## INTRODUCTORY NOTES

In 1984 the Inland and Coastal Fisheries Group (ICFG) of the MAFF Fisheries Laboratory, Lowestoft took on the task of collating and publishing the annual salmon and migratory trout fisheries statistics for England and Wales. The statistics for 1983 were published as Fisheries Research Data Report No 5. This report presents data for 1984 and is the second of what is hoped will be an annual series.

The introductory notes to the 1983 data summarised the reasons for ICFG taking on the annual compilation of these statistics, and itemised the advantages of the proposed collation and publication procedures. Discussion with the Regional Water Authorities (RWAs) through the forum of the MAFF/WAA Fisheries Technical Liaison Committee (FTLC) has led to a number of improvements being incorporated in the 1984 data and, we hope, will continue to provide both the impetus and means for further development of the statistics. The improvements implemented in this report were agreed at an ad hoc FTLC meeting on catch statistics and stock monitoring held in September 1984 and are:

- (i) the adoption of a new set of standard forms for returns to MAFF and of standard closing dates for all rod returns (30 June) and for subsequently supplying completed data to MAFF (1 August). An earlier publication date for the annual fisheries statistics has thus been possible;
- (ii) the inclusion of percentage return rates for salmon and migratory trout rod licences;
- (iii) the inclusion of nominal catch of Atlantic salmon for high seas interception fisheries and for home waters fisheries. This data is cited by permission of the International Council for the Exploration of the Sea (ICES);
- (iv) the provision, where not supplied previously, of a monthly breakdown of both rod and commercial catches.

It is important to remember that the catch data recorded in this document represent declared catches only and as such will not be an entirely accurate record of the total numbers of fish landed. Furthermore, the problem of relating catch to stock, even assuming accurate catch data, remains highly uncertain. Great care must therefore be taken in using these figures to derive anything beyond a measure of catch.

As reported in last year's statistics, ICFG have compiled a review of catch statistics covering the period 1951-82. This data is now in the final stages of validation and will then be published as the authoritative national data set for this period. Pending final validation of these data, the catches for England and Wales given in Table 12, with the exception of those for 1983-84, must be considered as provisional.

Table 1 Water Authority annual statistics collection procedures

Water Authority	Commercial catch			Rod catch			General		
	How catch return is made	Details given in returns	Date available	How catch return is made	No. reminders issued	Details given in returns	Date available	Weight categories for salmon	Data stored on computer
General procedures	On forms provided by WA & by date normally specified by bye-law	Daily totals of nos & wt of fish caught by method of capture. These are aggregated by WA to produce weekly & monthly sub-totals	(Following year unless stated)	On tear-off section of the rod licence & by a date normally specified by bye-law	-	No, wt & place of capture of individual fish normally supplied by licensee. Aggregated by WA to produce weekly & monthly sub-totals	(Following year)		
Northumbrian	Reqd mthly	As general	January	Reqd by 30 Nov	0	As general	March	± 7 lb	Yes
Yorkshire	Reqd by 15 Nov	As general	March	Reqd by 15 Nov	1	Monthly totals	Mar/Apr	± 7 lb	Commercial data only
Anglian	No returns required (a)			No return reqd. Negligible catches	-				
Thames	No commercial catches			Reqd by 30 Nov. No form. Negligible catches	0	As general	Jan	± 7 lb	Yes
Southern	Reqd by 30 Nov. No forms supplied	Monthly totals of nos. and wt. by river of capture	March	Reqd by 30 Nov.	0	Monthly totals of nos & wt by river of capture	1 March	No	Yes
Wessex	Reqd by 15 Nov	Weekly totals	March	Reqd by 15 Nov	2	Monthly totals	Mar/Apr	± 8 lb	No
South West	Reqd monthly	As general, but no weekly sub-totals. Individual wts. of salmon and sea trout required on daily basis	October (same year)	Reqd within 14 days of expiry of licence	0	As above, some aggregation. Wt totals not compiled by WA - data considered too inaccurate	July	No	Yes
Severn Trent	Reqd by 31 Oct	As general	Jan/Feb	Reqd by 31 Oct	2	As general	Mar/Apr	3 categories (-7, 7 to 15, 15+ lb)	No
Welsh	Reqd monthly	Daily totals of nos of fish caught in specific wt gps + no of tides fished. These are aggregated to produce mthly sub-totals by wt gp	Oct/Nov. (same year)	Reqd at end of season	1 or 2	As above, some aggregation. Method of capture also recorded. Effort data reqd as no of days or part days fished	April	1 lb wt gps up to 20 lb	Yes
North West	Reqd monthly	As general. Wts of individual salmon & sea trout also reqd	November (same year)	Reqd by 30 Nov. No record of licence holders	0	Monthly totals	Mid Jan	± 7 lb	No

(a) AWA hopes to introduce compulsory returns for net catches shortly

Key: (a) Applies to concessionary short term licences also.  
(b) General licence. Various duties apply.  
(c) Block licences for 1 day and covering many anglers. Duty is per angler.  
(d) Temporary one site licence. Duty is per angler.  
(e) Special junior licence.  
(f) Secondary licence for additional rod.  
(g) Licences include second rod for coarse fishing.  
(h) Numbers include day licences also.

Key:		(a) Data includes 14 fish for which no weights or monthly breakdown were available.													
		(b) Catches included under Tavy and Tamar as appropriate.													
		(c) Includes data for putts/putchers and stop nets.													
		(d) Incomplete returns.													

Note A dash is used to denote months that fall entirely within the annual close season.

Key: (a) Data from fishery owner's returns, not catch returns.																
Note 'Principal rivers' include all rivers supporting commercial fisheries or with mean annual rod catches in excess of 30 salmon or 100 sea trout, plus some smaller rivers selected by RWAs. Catches from tributaries and from minor rivers with a shared estuary are included under the appropriate main river. The catch from remaining rivers in each region is aggregated and recorded under 'others'.																
A dash is used to denote months that fall entirely within the annual close season.
